

Version 6.5.1 Now Available!

Complete Closing Enterprise™

Closing and Escrow Accounting Production and Automation

Complete Closing Enterprise™ is the comprehensive Closing and Escrow Accounting Production and Automation component of The RamQuest Software Solution™. The flexibility, functionality, and capability it provides will help your business achieve cost-effective growth and gain the competitive edge you need to continually increase efficiency and market-share.

OVERVIEW OF NEW FEATURES IN VERSION 6.5.1

Complete Closing Enterprise (CCE) 6.5.1 offers new features and benefits impacting your title company's capability and functionality. Here are a few of the new features in this release:

- » **2010 HUD-1 Production.** CCE 6.5.1 allows RamQuest users to easily and intuitively generate a 2010 HUD-1. CCE 6.5.1 also offers users the flexibility to select the pre-2010 or the 2010 version of the HUD when opening any file giving the capability to meet any business need. The results of RamQuest's unrivaled involvement in defining and defending the title industry position on the impacts of RESPA reform are apparent when you see how easily RamQuest's CCE 6.5.1 handles 2010 HUD production and also how it enables users to better understand the RESPA Reform regulation itself.
- » **Enhanced Workflow Automation.** Additional functionality throughout CCE including the ability to add "on the fly" task list entries to RamQuest's predefined and customizable workflows, streamlined email capabilities, additional search options and a number of new communication tools further enhances title company operational efficiency and effectiveness.
- » **Extended File Tracking Capability.** New features like the ability to add notes when moving paper and paperless files between departments and multiple department alarms give more visibility to the enterprise and enhances file tracking within an organization.
- » **Ability to Capture Additional Information.** Notary information can now be captured in Complete Closing Enterprise and, once in the system, added for each Buyer and Seller for a file.
- » **Enhanced County Filing Capability.** The option to display recording time to include seconds has been added, improving filing efficiency in counties that have moved to time stamping recordings in this manner.

SEAMLESS INTEGRATION

Complete Closing Enterprise™ gives your business options with the seamless integration of The RamQuest Software Solution™ allowing you to easily add PaperlessCloser™, FileScan Plus!™ or Closing Market™ when you're ready.

GROWTH OPPORTUNITY

Closing Market is RamQuest's business-to-business, system-to-system network allowing title companies, lenders, and settlement service providers to order, exchange, and fulfill title and settlement products and services across a secure digital connection. Title companies with Closing Market are easier to do business with and have a competitive advantage because they provide a greater level of service through automation in an efficient manner that helps keep operations profitable and strengthens their customer relationships. CCE 6.5.1 with Closing Market is a game changer!
