

Collect Wet-ink & Electronic Signatures... in less than 10 steps

PRE-CLOSE

Export single or multiple documents from your system.

PROCESSING

Unique, Inx-patterned document(s) return to your system.

Print the document(s) on a laser printer.

AT-CLOSE

Sign document(s) with the digital pen.

Tap the patterned element on your Inx card with the digital pen to securely upload the document(s).

Check your smart phone, confirm the document(s) are received, add any attachments and send.

PROCESSING

POST-CLOSE

The signed document(s) are immediately returned to your system for quality control review.

PROCESSING

You'll also be able to see notes and all attachments in your system.

In addition to offering the extraordinary flexibility of both an electronic and a wet-ink signature, the Inx system delivers numerous other benefits.

Effortless Adoption – no different than your current closing process

Reduces Fraud – date/time-stamped pen strokes link to signing location GPS coordinates and may include identity verification attachments

Quick to Deploy – user friendly process requires very little training

Advances Remote Closings – enables immediate transmission of electronic, signed documents

Highly Flexible – simultaneously collect electronic and wet signatures while signing multiple documents

Low Cost of Entry – minimal investment and no document field definition needed
